Travel Moves

Travel Along the Path

When you **travel from clearing to clearing along the path**, the band collectively decides how it travels and one member rolls:

- at a relaxing pace: everyone clears 3-exhaustion; the band collectively marks a total of 2-depletion; -1 to the roll.
- at an average pace: everyone clears 2-exhaustion; the band collectively marks 1-depletion; +0 to the roll.
- safely, quickly, and under the radar: the band collectively marks 1-depletion for supplies; +1 to the roll.
- urgently fast: everyone marks exhaustion; +2 to the roll.

On a hit, you reach the next clearing in a timely fashion. On a 10+, the trip is uninterrupted and quick. On a 7-9, you encounter something noteworthy on the path—a caravan, a battleground, or something else odd passing through. On a miss, you are caught in the middle of a dangerous situation before you arrive at the next clearing.

Travel Through the Forest

When you **travel from clearing to clearing through the forest**, the band collectively decides how it travels and one member rolls:

- slowly, foraging heavily: everyone clears 2-depletion; the band collectively marks an exhaustion for each band member; -1 to the roll.
- carefully, avoiding trouble: the band collectively marks one depletion or exhaustion for each band member; +1 to the roll.
- as quickly as possible: everyone marks exhaustion and depletion; +2 to the roll.

On a hit, you pass through the forest to any clearing on the other side. Along the way, one of you spots an interesting site; you leave markers so you can return after you finish your trip. On a 10+, the transit is largely safe. On a 7-9, something from the forest is following you; you can let it track you, or every vagabond marks exhaustion to lose it. On a miss, you run afoul of one of the forest's dangers during the trip, and you can't escape it easily; deal with it before you can reach the clearing on the other side.
